

AIR
with Flavour®

Instructions for fitting the battery in the AIR with Flavour® Pump

Step 1

Ensure you have the AIR with Flavour® pump
and 1x "D" Cell battery ready.

Step 2

Turn the pump over so the back is facing you.
Unscrew the small screw on the battery
compartment and open the lid.

Step 3

Insert 1x "D" Cell Battery, as shown above.
Ensure battery is inserted the correct way.
Please only use new batteries.
DO NOT use rechargeable batteries.

Step 4

Once battery is fitted, close the lid, and reinsert
the screw and tighten.

AIR
with Flavour®

Instructions for use

8000-UK Pump

- 1 For best results, always use clean glass or beaker
- 2 Pour approximately 50ml of chosen liquid into the glass or beaker.
- 3 Add sachet contents of Air with Flavour® to the liquid and stir.
- 4 Leave to stand for a minute and stir lightly again
- 5 Place the pipette into the silicone tubing and switch on the Air Pump, gently insert the pipette into the glass or beaker of liquid.
- 6 Continue holding the pipette in the liquid as it starts to foam up.
- 7 Once the foam reaches the top of the glass or beaker you can stop the pump and spoon the foam off.
- 8 The liquid can be re-foamed numerous times to continue enjoying the taste!

Note: When foaming alcohol or very sweet liquids, it is advised to dilute it slightly more with water to improve the foaming action.

Ensure you have the air pump, disposable pipette, tubing and Air with Flavour® sachet ready

Push one end of the tubing onto the air pump outlet

Push the other end of the tubing onto the thin end of the disposable pipette

Pour approximately 50ml of the chosen liquid into a clean glass (neat alcohol requires diluting)

Open a sachet of Air with Flavour® powder and pour into the liquid

Stir the powder into the liquid ensuring it is well mixed

Switch on the air pump and insert the pipette into the liquid

The air is forced through micro holes in the pipette and starts creating the light airy foam

Allow the airy foam to rise out of the glass and then turn the pump off

The airy foam can be scooped off and served immediately

The foam is instantly soluble and allows taste stimulation or mouth moistening without the need of swallowing.

The liquid can be re-foamed to continue the fantastic taste experience.
